

STATEMENT OF REACH AND CLP COMPLIANCE

Derypol, S.A. wants to inform about the situation of our products with regard to the Regulation 1907/2006 (REACH) and Regulation 1272/2008 (CLP).

We first wish to report that all the substances contained in our products (blends):

- have been pre-registered and/or have been registered by our company and/or our suppliers, and/or
- are excluded from the Regulation (REACH), and/or
- are exempted from registration.

This confirmation refers to all products currently delivered to the market.

At present we already have evidence of some registrations, but for some other substances not yet. This is because in some cases the applicable deadline is beyond 2010. For these cases we have word from our suppliers telling that they have presented the corresponding registration dossiers in due time. Said this we consider that all of our products meet REACH requirements.

Concerning CLP the first consideration is that our products are blends. This regulation establishes that starting on December 1 all the Safety Data Sheets (SDS) must be updated in accordance with CLP. From then till 2015 substances will be classified in accordance with CLP and with Directive 67/548/EC simultaneously. Blends will be classified under CLP not later than June 1 of 2015.

Some ingredients (polymers) have been notified in accordance with CLP. At this point our compliance with the CLP regulation is complete as well.
